

Still Operating on Analog RTU/MTU

The SOLUTION is Here!

Why Digital **WITHOUT** Cellular matters

Analog Has Reached End-of-Life

- Increasingly unreliable
- Obsolete components
- Expensive maintenance
- Limited scalability

Upgrade to a modern, fully DIGITAL platform.

A fully digital, radio-based SCADA platform engineered to replace aging analog RTU/MTU systems with a dependable, long-term solution!

If your operation depends on aging analog infrastructure, reliability and scalability are at risk

Built to replace-not patch-outdated analog systems

To provide scalable, engineered systems built for critical infrastructure, ScadaMasters work directly with

- Manufactures' Reps
- Dealers
- System Integrators
- Self-Maintained Utilities

- Independent of commercial cellular networks
- Designed to operate during outages
- FCC compliant licensed radio
- Browser-based programming
- Engineered for mission critical infrastructure
- Unlimited # of users
- Intuitive browser-based interface
- Ready for large screens or any PC

When cellular fails your system continues to operate!

Digital WITHOUT Cellular is the Future!

The Future is Here!
